CLARESHOLM, ALBERTA, FRIDAY, MAY 14 1926

Hurry! Hurry! Hurry!

TO
The Men's and Boys' Store

We only have a few suits left of the wonderful bargains which we have had on sale. Come early and get your size. Almost two suits for the price of one.

We are also putting on a shoe sale. Wonderful bargains. Our loss is your gain. Don't fail to get one or two pairs:

14 pairs Men's Dress Shoes, regular \$9.75 for \$6.95
49 pairs Men's Dress Shoes, regular \$7.50 for \$4.95

C. J. BRAREN

A SNAP

See me at once about that snap I have seven miles from Calgary.

Only \$40.00 per acre.

Good buildings and water. Quality of soil, well, it produced 53 bu. of wheat two years ago and 49 last year, 31 off what was stubbled in. Mostly new land.

Widow's son died a few weeks ago, and wants to sell at once.

This proposition has oil backed clean off the map. Let me tell you about it.

S. L. FRASER

Now Is the Time

to have your harness repaired. Bring them on your next trip to town. Expert harness and shoe repairs. All work guaranteed. Our shoe repair department is up to date. We carry a full line of harness, saddlery, fancy leather goods, trunks and bags, shoe supplies, etc.

J. T. KINGSLEY

The Oldsmobile Car

When selecting an automobile you naturally try to find a car of good appearance, durability, economy, comfort and right price. We believe your investigation will show that the Oldsmobile has these features.

ALSO A GOOD TWO REEL COMEDY

ANNOUNCEMENT

**Clarks' Are Back in the Old Stand
Again with a Brand New Stock
of General Merchandise**

Our grocery stock is very complete and we hope through your co-operation as patrons to keep it turning, thus enabling us to have our foodstuffs always fresh.

With the exception of our lines of fine shoes and a few import goods our stock of dry goods and furnishings is practically complete. Related shipments are arriving every few days.

Our motto is and will always be an up-to-the-minute stock with no shelf-worn goods to offer at any price.

In the past we have had many pleasant business relations with many of the old timers and we now hope to be again favored with their patronage. The more recent residents we promise to serve with diligence and consideration at all times.

Don't fail to take advantage of our opening offer—see our ad.

We are now at your service under the name of

CLARESHOLM LOCAL NEWS

Mrs. T. C. Larsen has returned from the local hospital and is improving.

Mrs. D. S. Morrison has returned from the hospital in Calgary and is on the mend.

Services will be held in St. John's church on Sunday next, May 16, at 11 a.m. and 7:30 p.m.

Brett Grainger has left the Clareholm Garage to start in business for himself at Waterton Park.

Eric Moffatt has left the Clareholm Garage Ltd. and has accepted a position with Quilly & Yokum.

The ladies of St. John's Guild wish to announce the date of their postponed tea as Saturday, May 29th.

On account of the impossibility of arranging a baseball match on May 24th, the sports at Clareholm have been postponed to a date in June not yet fixed.

The Golf Club will hold a dance in the I. O. O. F. Hall on Monday night, May 24th, Victoria Day. Day Bills are out announcing the event. Mack's Melody Makers will play.

Clareholm Chautauque dates for this summer will be July 24 to 30 inclusive. On this year's program are as fine a lot of artists as have ever been assembled for a western circuit.

Rod La Rocque in "The Coming of Amos," with Jetta Goudal, Noah Beery and Trixie Friganza, at the Rex theater on Friday and Saturday nights this week. A Cecil B. De Mille production, adapted from the novel by William J. Locke.

The Rev. Geo. Webber will preach in Okotoks, a former charge, on Sunday morning and evening. On Monday Mr. Webber goes on to Edmonton to attend the sessions of the settlement committee and Conference of the United Church in Alberta.

In this district there was a light rainfall early in the week. There were some windy, dusty days and some fine days. Wheat seeding is finished and other grains nearly all in. There is sufficient moisture in the ground for present needs, but rain would be welcome.

Canadian Pacific Crop Report

The Canadian Pacific Railway's crop report for Alberta under date of May 10 says:

Early liberal rainfall is reported in Alberta during the past week for northern, central and southeastern districts, but none in southwest. This section needs precipitation as the surface is dry, though subsoil is moist. Considerable drifting has occurred but damage is not extensive. Spring conditions through the province are excellent. Spring work is well advanced and seeding of wheat should be completed, weather permitting, before the end of the

week. First seeded portions are already green with new wheat crop. Seventy-five to eighty-five per cent of wheat has been sown in southern Alberta and about thirty-five to forty-five per cent of oats and barley in the central and northern sections from fifty to seventy-five per cent of wheat and twenty-five per cent of coarser grains. Rye, fall wheat and alfalfa are all reported looking well, and an increase of from twenty-five to fifty per cent in corn and clover acreage is expected in most sections of the province.

Cemetery Board Report

The Cemetery Board met recently and made arrangements for work to be done on the cemetery in 1926. It was arranged to plant about 70 more Northwest poplar. It was felt by the committee that there are many who while not subscribing to the maintenance fund still should be able to find time to do a little work on their own family plots.

Farm Land Values In Western Canada Advancing With Agricultural Prosperity

Increasing prosperity in the agricultural industry, with the consequent satisfactory farm revenue all over the Dominion, and a resultant reawakening of interest in the acquisition of Canadian farm lands on the part of many interests, has commenced another rise in the value of Canadian farm property of which there is no likelihood of a consistent continuance. According to the last return of the Dominion bureau of statistics, the average value of occupied farm land for Canada as a whole, including both improved and unimproved land, as well as dwelling houses, barns, stables and other farm buildings, was \$35.00 per acre in 1925 as compared with \$32.00 in 1924 and the same figure in 1923.

According to reliable authorities, farm land prices in Canada have been as low as they ever will be. "There was a steady rise in the average value of Canadian farm land up to 1920 when it reached the peak of \$43.00 over the Dominion. In 1921 and 1922 it stood at \$40.00 and in 1923 and 1924 at \$37.00. Now a new rise has commenced. British Columbia values are higher than they have been for years for 1914. Ontario values stand about where they did in 1919, and Quebec in 1917. Prince Edward Island values were where they were in 1915 and 1916. Nova Scotia in 1918, whilst the value of New Brunswick land has risen steadily above 1920 values. On the prairies, values in Manitoba and Alberta were in 1919 and 1920; in Saskatchewan, the same as 1915 and 1916.

The most important Canadian holdouts to farmers elsewhere are those who pursue their calling in her domain in that her new lands may be secured cheaper than farm lands practically anywhere else, and that the high fertility outstrip higher priced lands.

Thus, there are few sections on the American continent where land may be purchased at a lower rate than in Manitoba, Saskatchewan or Alberta, and yet these sections are consistently higher yields and consequently greater revenue. Lands in the three provinces, recorded and having the respective values of \$20.00, \$24.00 and \$26.00 in 1925, returned in that year from the average acre devoted to wheat \$19.94, \$20.25 and \$24.08. In each case an acre of land seeded to wheat practically returned its value in a single year.

The values quoted throughout are for occupied farms to some extent cultivated and having an income value by reason of various buildings upon them. They do not take into account lands in every part of the Dominion as yet uncultivated, but which are productive, which are naturally of still lower value. These are similarly affected by the circumstances of agricultural prosperity and greater demand. There is every indication that overpopulation in settlement at the present time will mean that in the succeeding year land purchasers will have to pay a little more.

Horse Has Its Place

Services More Seriously Appreciated Now and Price Has Advanced

A news item published in The Globe a few days ago carried the information that, after ten years of uncertainty, the horse was again coming into his own, but it is hardly probable that the revival will be sufficient to bring back the village blacksmith. There is undoubtedly, however, a new alignment which recognizes the horse as having a permanent place in the scheme of things; that he is an economic factor as well as an animal of intelligence and beauty whose services are more seriously appreciated today than for a long time. In the past, the horse was in this country as he has caused his numbers to decline, he can find compensation in the fact that those who want his services must pay for his indifference, for his price has gone up.—Toronto Globe.

Wool Growers Have Successful Year

At the annual meeting of the Canadian Cooperative Wool Growers, Limited, it was shown that in the past year the association had sold well over three and a half million pounds of wool for well over a million dollars. This was an increase of 1,225,000 lbs. over the previous year and indicated that 1925 was one of the most successful years in the association's history.

Prince Names New Horse

"Herd to Find" is the name the Prince of Wales has given one of his new horses. The pedigree of the animal is unknown.

W. A. U. 1925

World's Poultry Congress

To Be Held in Ottawa July 27 to Aug. 4, 1927

The selection of Canada as the country in which the third world's poultry congress will be held is a marked tribute to the prominence which this Dominion is attaining among the nations of the world. Only two previous congresses have been held; one at The Hague, and one at Barcelona, Spain. The showing of Canadian poultry at the Barcelona congress was so outstanding that the invitation extended by the Canadian Government to hold the next congress in Canada was accepted, notwithstanding keen competition for the honor by other countries.

The preliminary announcement of the third world's poultry congress has just been issued from headquarters at Ottawa. It is a very attractively prepared and illustrated booklet which will carry into all civilized countries not only the congress announcement, but a better conception of Canada and things Canadian. The information contained is both complete and up-to-date, and the illustrations reflect the various aspects of Canadian life. Agriculture, naturally, plays a large part, but the scenic beauties of the country, and its progress in its industrial and artistic development, have not been overlooked.

The third world's poultry congress will be held at Ottawa, July 27th to August 4th. Full information may be obtained from the minister of agriculture in each province, who is chairman of the congress provincial committees, or from Ernest Rhoades, Congress Secretary, Experimental Farm, Ottawa.

More Homesteaders

Increase is Shown in Number of Entries For February

Homestead entries in the western provinces in the month of February totaled 350, as compared with 297 in February last year, a net increase of 53. According to a report issued by the Dominion lands patent branch, The distribution of entries by provinces for the month was as follows: Manitoba, 38; Saskatchewan, 172; Alberta, 126; and British Columbia, 14. For the first two months of the current year entries totaled 628, as compared with 440 during the corresponding period of 1925.

House Built Without Nails

Field cottages built by wooden pegs instead of nails are now being erected at a new house of elaborate pattern is one of the sights of Atlantic City. It is the Michigan State house, built for the Philadelphia Centennial fifty years ago, and was moved to its present location after the fair. Despite its age, it is not unadorned, a very different in an excellent state of preservation.

It is said that hasty make waste you seldom find a hustler in an alms house.

It is said that hasty make waste you seldom find a hustler in an alms house.

The Real Thing

At a certain American factory, honey was being put into jars. On the bench was a heap of dead bees and the curious visitor wondered what they could be for.

"Wah!" said the manager. "I guess we use one bee into each jar."

"But why?" persisted the visitor.

"Because, sir," came the reply, "we are sure our customers will be getting genuine honey, so we just send 'em along the bug that made it."

Plenty of Farm Work in Alberta

Fifty hundred farm laborers from British Europe were placed on farms in the Edmonton district in two days, at the end of March. In every case the flow of immigration is being well taken care of in Alberta and there is little or no difficulty in finding work for those who are unable to take up farm life there. At the outset, either through lack of money or lack of experience.

The stockbroker was very ill, and at times delirious. In one of his lucid moments, he asked the nurse, "What's the latest reading had shown his temperature to be."

"One hundred and one," replied the nurse. "Good," "veteran on the right is Acting-Sergeant Wm. Clark, of the Company's Forestry, the palist. "When it gets to Palestine and Egyptian campaigns in the Near East."

Natural Resources Bulletin

Planting of Wood Lots and Wind-Breaks Adds Value to Farm Property

A few acres of sandy soil, a rocky hillside or an isolated area cut off by the proximity of a railway constitutes a good opportunity to plant a wood lot. In the pasting of years, it will prove profitable and valuable to its owner. The proven usefulness of windbreaks and the increasing value of both hard and soft woods to the land owner is a factor that should not be overlooked, points out the natural resources intelligence service of the department of the Interior. Trees will thrive on soil that is otherwise unproductive. They provide shelter to stock and to adjoining fields, and at the same time form a picturesque feature to the landscape. They beautify and incidentally increase the intrinsic and saleable value of the land. Except in the initial stage of growth, they require practically no care.

The federal and most of the provincial governments are prepared to furnish young trees and the advice necessary to their proper planting and care, so that the problem of laying out a wood lot should require practically no expense and little worry to the farmer or other landowner interested. The federal government has been particularly energetic in interesting landowners and municipalities in the possibilities of tree planting. During the first year that the Ontario forestry department undertook the work (1905) some 10,000 trees were distributed. Last year over seven million were distributed to over 3,000 applicants and the results being obtained will, without doubt, multiply the active interest in this work continually.

The work of the Federal Government has laid in the so-called prairie districts where distinctly pioneer work was necessary. Farm conditions on the former treeless prairies are now rapidly being transformed as the result of the introduction of windbreaks and shelter belts where formerly not a shrub decorated the landscape. Fast growing softwoods have been used with great success, but to these will be added other varieties. It is not improbable that as a result of the new order, some day, not very distant here, will see orchards and hardwoods that so pleasantly and so naturally grace the landscape. In Eastern Canada extending also over the fertile and vast plains between the Great Lake country and the Rocky Mountains.

Negroes Who Have Won Distinction

A negro's "Who's Who" is announced for publication soon by an interracial board of council composed of prominent men of both the white and colored races. The title chosen is "Notable Negroes of America." The book, it is announced, will contain 200 names of negroes who have achieved distinction in any field of endeavor.

It is the Michigan State house, built for the Philadelphia Centennial fifty years ago, and was moved to its present location after the fair. Despite its age, it is not unadorned, a very different in an excellent state of preservation.

Grain Inspection At Edmonton

Expected To Exceed Total For Past Two Years Combined

Grain inspecting at Edmonton will be predicted, exceed in volume those of the past two years combined. As in the recent time, a considerably larger amount of grain has been inspected locally than was the case for the crop year 1923-24, which stood at a record still little season. Figures from the office of the grain inspectors show that between August 1, 1923 and August 31, 1924, a total of 16,720 cars were inspected in Edmonton, while in the present season with five months of the year still to run, the total has reached 15,000 cars.

Does Not Want Sky-scrapers

The city of Cologne does not want another skyscraper, the city council has decided. One, a ten-story warehouse, is regarded as enough.

The majority of voters influenced the council in its decision. Sky-scrapers, it was said, would obstruct the view of the famous Cologne Cathedral, which towers above every building in the city and can be seen from a distance of several miles.

Badful lovers and kernels of corn

Unmistakable Signs Showing The Remarkable Growth Now Being Made By Canada

California's Potato King Dead

Little Jap Took Up Waste Lands and Made Millions

Death has claimed George Shima, multi-millionaire potato king of California, most affluent Japanese outside the Empire of Japan, a little man of an alien race who had made his fortune in California since his arrival as an immigrant boy 26 years ago. Shima came to America with his bride of a few weeks and no employment in the berry patches of later California. With his first year's earnings he purchased previously secured delta lands along the Sacramento River, near Stockton. People said he was "crazy with the heat."

Shima came to America with his bride of a few weeks and no employment in the berry patches of later California. With his first year's earnings he purchased previously secured delta lands along the Sacramento River, near Stockton. People said he was "crazy with the heat."

Wild Swans Enter Sanctuary

Only Known Resting Place in Canada

Two thousand wild native swans have arrived along the lake shore at Kingsville in front of the Jack Miner Hotel, where they congregated every year.

Since Mr. Miner secured the site that went over Niagara Falls forty years ago they have been the means of luring big flocks of swans to the lake waters of Lake Erie away from the Ontario coast, where they usually drifted over the falls, several hundred each year losing their lives.

The swans are the largest and most beautiful waterfowl on the continent, and Kingsville is their only known resting place in Canada. During the last season the water of North Carolina, and according to Arctic explorers, they nest in the Arctic Circle. The Royal Canadian Mounted patrol the shore by night and day, making sure that they are not molested by man or animals.

Wonderful Electric Shovel

Operated By Two Men But Does Work

Of the kind of the electric shovel. All known records for moving material with a power shovel were recently broken when an electric giant, southern mines loaded 3,700 cubic yards of rock on to cars in one night-hour shift. To accomplish this task the electric shovel, a 100-ton machine, eight cable yard dipper had to reach down, fill itself, rise, swing around and empty into a car at the rate of once every 15 seconds, and a half throughout the period. The rock moved by this single electric Titan would make a load of 100,000 tons, a volume of material a quarter of a mile long, and to load the same amount of rock by hand in eight-hours would require an army of fifteen hundred shovel men. The electric shovel was operated by two men.

Here and There

Claims staked in the Red Lake gold mining field are keeping the recorder's office busy. Prospectors are of the belief that the area from Red Lake to the Manitoba boundary is promising and already many square miles of territory west of Red Lake has been staked.

During the eleven months ending February 28, the ordinary revenue of the Dominion was \$127,828,449 or an increase of twenty-nine millions over the sum of \$108,994,297 for the corresponding period of the previous year. Ordinary expenditure is about the same as a year ago. On February 28 last it totalled \$126,929,417.

Archie Gee, the god-natured chef on the Canadian Pacific liner Empress of Asia, supervised the trans-Pacific voyage of 50,000 Canadian fish eggs from Vancouver to

Kobe. The shipment necessitated extremely careful handling. The eggs were packed in ice and had to be kept at an even temperature during the entire voyage.

Lord Allenby, conqueror of Palestine, was greeted by huge crowds on his arrival in Montreal in March. The leaders of the local militia were on hand to do homage to the famous general who placed a wreath on the monument to Canada's fallen soldiers in the Windsor Station. Viscount Allenby also spoke at the St. Denis Theatre.

The Dominion Experimental Farms system announces the introduction of a new and valuable variety of field peas which may mean to the field peas what Marquis has meant to the growers of wheat in the west. The new variety is a selection from a cross made at Ottawa between Mummy and Black Eye Marrowfat varieties.

Gross earnings of the Canadian Pacific Railway during 1925 amounted to \$181,356,000, as compared with \$182,502,136 in 1924, while working expenses last year totalled \$143,201,229 as compared with \$145,274,914 in 1924, leaving a balance, after deduction of fixed charges, of \$25,216,259 for 1925, as compared with \$22,656,955 in 1924.

"In Every Way—Better"

PEOPLE who look for and appreciate comfort in a motor car are invited to try the added comfort in the Better McLaughlin-Buick.

The Better McLaughlin-Buick is big enough and balanced correctly to carry itself well on any road, but not too big to be ungainly or hard to handle. Seating space is generous. Leg room is ample enough for tall people to relax. Cushions are deep and yielding and tilted to a restful angle. Rear springs are McLaughlin-Buick cantilevers, which smooth out road inequalities far better than any other type. Low-pressure tires are standard equipment on all models. Your first long ride in the Better McLaughlin-Buick will show you how restful miles can be.

The new low GMAC financing rates are available to purchasers of McLaughlin-Buick on time.

FIRE THREATENS OUR NATIONAL HERITAGE

Carelessness Destroys 3,000,000 acres annually of Canadian Forest

Loss of standing timber by fire continues to be appalling. On the average, over 3,500 million board feet are destroyed annually. The forests of Canada are being depleted at a rate they cannot possibly withstand; more than half of this depletion is due to fire, insects and decay. The future of the forest industry is just as dependent on the seedling trees and young growth as the pulp and paper mills, and industry generally, are dependent on mature timber—both must be saved from the ravages of fire.

In addition to the shelter afforded by the forest to the farmer and his stock, settlers in forested regions are vitally dependent on the woods for winter employment. Care with fire in land-clearing operations is all-essential.—burned timber pays no wages.

Canada has the finest inland fishing in the world, but these splendid food and game fish require clean; cold water in the streams to ensure prolific reproduction. Forest fires are inimical to fish life.

Game animals attract foreign tourists and induce Canadians to seek pleasure, health, and adventure in the great outdoors. These animals are distinctly a forest resource—utterly dependent on it for protection and food. Forest fires are most destructive of such wild life.

Ninety per cent of the forest fires are caused by carelessness. Are you doing your part to prevent this wanton waste and destruction?

Mighty Task Nears Completion

Work Was Started On Oxford Diction-

The literary world is stirred by the news that the Oxford Dictionary is nearing completion. That is to say that the last leaves will be proof read, corrected and bound in from two to three years.

It is difficult for the humble mind to appreciate the stupendous work which has been going on for nearly seventy years. Its inception goes back to 1857, when the university de-

based on sampling a total of words in the English language which would be the last word in dictionaries. There will be fifteen volumes in all. Ten have been issued, each weighing ten pounds, and as large as the old-fashioned family Bible. The complete work will contain seven miles of text—five million lines of type, two hundred million letters and figures, not including punctuation marks. Its chief function is to trace the history of English words. To this end all the

written records of the language were ransacked and laid under tribute from the earliest times—not only printed books, but also public records, manuscripts, and even private papers. The ordinary dictionary, confronted by alternatives, has to make some choice

and whenever it chooses it opens the way for error. The Oxford simply presents the whole evidence and lets the reader choose himself. It is a colossal mine of information about

words. It gives everything that is worth knowing about them. And it adds a great deal that is simply strange and curious.

The amount of labor that went into it is appalling to contemplate. "It is

a standard work of reference of great historical value upon which thousands of the most learned minds in the universe have collaborated. Many of those who spent their lives upon it are dead. One wonders whether it has been worthwhile to absorb so much brain power in a task of this kind. But even looking at it from the narrowest point of view, no one can compare the completion of the

"Big Ben" Has Large Audience

Thousands Tune In Daily To Hear
Wonderful Bell Chime
"Big Ben" is the regulator of time
for the citizens of London, England

Twice in the day a mechanical contrivance in the clock closes an electric circuit, the effect of which is to deflect the needle of a galvanometer in the time department of the observatory. The assistant in charge watches for this deflection and notes its time in the Greenwich Mean Time Clock which is close at hand. The deflection

If the clock is persistently wrong, three or four seconds for several

days, the firm of clockmakers that have the Westminster clock in the charge are informed, and it is all right. It is only in consequence of thunderstorms or an accidental disturbance of the pendulum that a far

The first, second and third quarts all begin to strike at those times respectively, but the fourth quart begins about twenty seconds before the hour, so that it may be finished nothing before the hour is reached.

Mexico Would Ban Jazz
In Mexico the ministry of education represents the introduction of jazz, saying it is degrading melody corresponding to the taste of savage tribes.

Mexico is making efforts to discourage the spread of this United States form of music among the younger generation.

WORLD HAPPENINGS
BRIEFLY TOLD

Talbot Burbank was buried under the old Lebanon cedar tree that stands in a corner of his garden, across the highway from his home.

J. S. Woodworth, Labor, Winnipeg North Centre, presented a petition in the house urging the payment of pensions to the blind.

The auxiliary schooner, *Ellie Morrissey*, owned by Captain Robert Bartlett, of St. John's, Nfld., is being utilized at Beluga for an expedition to the Arctic during the coming summer.

Silver plate and trophies from the German battleships *Scharnhorst* and *Leipzig*, sunk by the British off the Falkland Islands, have been discovered at Sydney, N.S.W.

Just after leaving Hong Kong harbor on a trip to Singapore, the British submarine *T23* collided with a ferry boat. There were no casualties, but the submarine was badly crippled.

The fortified island of Relying off La Rochelle, believes it holds the world's record for the number of the look among its female population. In a population of 11,000 there is only one looked female here.

Kamonn De Valera, who recently resigned from Sinn Féin when the extremists among his republican followers refused to accept his proposal to compromise with the Free State, is forming a new organization to work for Irish freedom.

An air service across the Arctic, or at least the sub-Arctic regions, should be in operation within a few years. In the opinion of Commander, George P. Mackenzie, who is in charge of the Canadian Government expedition which yearly visits the government posts in the far north.

Nearly a score of bills designed to enlarge quotas under the immigration restrictions law were rejected by the U.S. Senate immigration committee.

A million dollar art museum to be erected at Yale University to house the valuable collections now in its possession. The donors are anonymous.

The directors of Barclays Bank, London, in announcing a pension scheme for women employees, state that on marriage women will be required to relinquish their positions on the staff. They will then receive a gratuity equal to 5 per cent. of their annual salary for every completed year of service.

Convicts Whine Over Trilles

Modern "Bad Man" Not Old Hard-Baited Type

Convicts these days are not the old hard-baited type of slaves—past men who were really tough and skilled in it and could take or give a blow with out any fuss.

The modern "bad man" is more the afternoon tea and powder-puff variety who suffers from "nerves" and likes to cry about it.

This is indicated in the latest prison report of the governor of Dartmoor. Prison for gentlemen has become a deplorable condition.

"The present-day convict is far better educated than his confrere of olden days," said the governor, "but he is softer and more apt to whine over trifles. Anomaly are almost unknown, but perfidians are becoming a cult."

Favorable Trade Balance

A balance favorable to Canada was maintained in the trade of the Dominion up to the end of February, a statement issued by the bureau of statistics shows. In that month imports to the value of \$79,800,000 were recorded, while imports were valued at \$87,512,147. For the twelve-month period ended February 28, last, exports reached a value of \$1,297,243,653 and imports \$1,107,107,052.

A pedestrian used to be a person who walks. Now he jumps.

TIPPITY-WITCH IRENE

Children Looking For Work

190,000. In England Have Been Released From School

More than 190,000 British children who had attained the age of 14 were released from school and placed on the labor market which has little place for them.

In the past children were permitted to leave school on attaining the age of 14. This released them throughout the year, and it was possible for them to be absorbed in industry and commerce gradually.

Under the new system children who cannot leave school until the end of that term. This makes it so many applicants for positions the same time that employees say many of the children must necessarily remain idle for a considerable time before they can be absorbed into the industries.

Hawaiian Mermaid Sets

New Swimming Mark

Miss Marjorie Whelan, famous Hawaiian swimmer, of Honolulu, photographed at the Crystal Gardens, Victoria, where she recently won Canadian swimming honors from Miss Hazel Kessler, of Winnipeg, in the 22nd annual indoor swimming competition, making the distance in 2:52.25, the previous record for Canada being 3:15.25 made by Miss Kessler, at Winnipeg, in 1923. Since the opening of the Crystal Gardens by the Canadian Pacific Railway last season, this is the second time that swimming records have been broken in its 150-foot tank. Just a few months ago the famous Johnny Weismuller and Conrad Moll, of the Illinois Athletic Club, of Chicago, made new world's records there, bringing the attention of swimmers everywhere to this already well known sea-water tank on the British Columbia coast.

Tenderfoot Kills Famous Grizzly

Hunted For Decade Falls Victim To Rank Amateur

The famous old grizzly bear, Elven Birch, which has been hunted by parties of big game hunters from all over the country for more than a decade, is dead at last, shot by a rank amateur armed only with a .22 caliber automatic pistol. Elven Birch was given his name because of his immense feet, as demonstrated by his tracks in the mud. Other grizzlies measured up to seven and eight inches, and sometimes an extra large one would measure eight and ten inches higher, but the famous big fellow topped them all with an eleven-inch foot. Nobody ever measured his real foot, of course, until after he was killed, but his foot print was known to all—Buckey Mott said.

Eat Apples With Skins On

Apples are more beneficial if eaten with the skins on, and also cooked with the skins on, because next to the skin comes a nutrient and vitamins which the body needs. These are removed if the apple is peeled.

War reduces the density of population, but diplomats remain just as dense.

Some barefooted live are old enough to have a full beard.

ON THE AIR

What Is Doing in the World of Radio

Experts of radio apparatus from the United States to the remainder of the world have risen in six years from an item of less than \$1,000,000 to one that in the year just past was only a few dollars short of \$10,000,000.

South Africa is expected to follow the lead of Great Britain in licensing broadcast receivers, according to advice. A heavy penalty will be imposed on those who fail to comply with the licensing regulations.

Station KFFE, Oklahoma City, has been made defendant in a \$20,000 libel suit. The suit concerns statements made by Rev. Lincoln McCannell while the station was leased by him.

Str. Harry Lauder, world famous Scottish comedian, was able to save his wife out of a telegram while in London. He was broadcasting from station 2LO and, knowing that his wife who was in Glasgow was listening, he included a short message to her.

Radio broadcasters are eternally on the watch for promising material for their programmes and hold regular auditions for that purpose. Out of the rank of the ordinary and average at times there emerges a distinctive voice or a splendid musician who compensates for the rest.

An interesting record in long distance radio reception on a moving train has been established by the Continental Limited, the transcontinental express of the Canadian National Railways, in picking up and holding for thirty minutes a broadcast from Vera Cruz, Mexico.

An automatically controlled radio telephone service is in operation between two public stations, one in Honolulu and the other on the island of Lanai, 60 miles distant. The system includes a bell ringing device to notify one end of the "line" that the other desires to converse. Power is supplied by storage batteries.

Healthy Body Able To Resist Cancer

German Doctor Proved Statement By Experimenting On Himself

Cancer is not contagious when brought in contact with a healthy human body. In the opinion of Dr. Hans Karsch, of the surgical clinic of Konigsberg University, Dr. Karsch astonished a convention of German surgeons in Berlin by reporting that he had experimented on himself, transferring a patch of cancerous growth from a patient's personal skin to his own thigh. The cancer cells, he reported, died shortly, being unable to live in a healthy body.

Canada's Large Shoe Output

Statistics received by the bureau of statistics from 141 boot and shoe factories, out of a total of 454 factories in operation in Canada, show that 1,188,661 pairs of leather and felt footwear were manufactured during the month of January last. This total comprised 1,103,198 pairs of boots and shoes with leather or fabric uppers, and 85,463 pairs of felt footwear of all kinds of cloth slippers for house wear. These totals are exclusive of hosiery and shoeapack and infant hosiery.

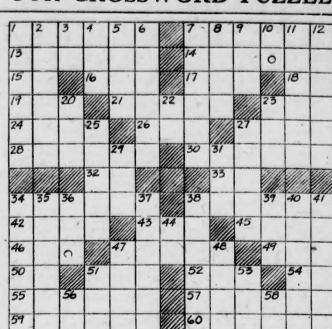

Sail For North Pole

Lieut. R. H. Byrd, who was one of the fliers who circled the world for the United States navy, has sailed for Polar Point, his expedition being financed by several wealthy American business men. He will strive to locate the North Pole and will make scientific observations during his flight.

Study Of Dead Things

Millions of young people spend years in school and college studying dead things without learning anything of the live subject of taking care of themselves, the most important in the world—E. W. Howe's Monthly.

| 63—Seventh note of the diatonic scale. | |

Did Their Bit In War

London Busmen Crossed Channel With First British Expeditionary Force

An inspiring portion of the epic of the London bus would be the narrative of the part it played in the war. When the first British Expeditionary Force—the "Old Contemptibles"—crossed the Channel a large number of London buses, mobilized for transport purposes, went with it, and "did their little bit," much to the amusement and delight of the Tommy and the "Old Bill," to whom the "blinking, blooming bone-layers" from "Jeh-O-Born" and Longfibre Hall were a never-failing subject of appreciative banter and good natured sarcasm. Now have the people of London forgotten how the busmen stuck to their jobs, and rendered fine service during the "tense days" of the air raids.

To the soldiers, from all parts of the empire, "Blighly" without the buses to take them around would have lost its charm; and, as surely to-day as then, in a vast number of visitors old London Town, relieved of the stir and bustle, the rumble and roar, of the tide of "bumble" traffic through her historic streets, would not somehow, seem the same—Ofawa Journal.

Women Doctors Successful

Dance Lottia Aldrich-Blake, whom we have been proved at over 438,000, was only one of several women doctors who have made fortunes in medicine. A woman doctor in Westminster is making an income of probably \$2,000 a year. Medicine is much more profitable for women than law, for there must be at least half a dozen women in a year. Medicine is much more profitable for women than law, for there must be at least half a dozen women in a year.

A man frequently loses interest in a subject as soon as his argument is exhausted.

Gov-General's New Limousine

The Finest Car Ever Produced in the Dominion

The fact that the governor-general's new limousine, presented by Canadian war veterans, is the finest car ever produced in Canada is said to be largely due to the fact that war veterans employed in the plant at Ottawa where the car was built, made a special drive on the job. Everything for "Bug's car" got extra service and the men put the extra work into it as their contribution to Bug's gift. The presentation of the car was not the complete story, for the veterans have also provided for life insurance and even its transportation to London when his excellency returns to the motherland.

Perfect Strangers

Frank A. Munsey told a story about a man who gave to all the virtues. The virtues were very jolly and sociable at the feast, but two of them—the two most beautiful of them—seemed stiff and constrained in each other's presence. "Accordingly," Jupiter, took the one virtue by the hand and led her to the other. "Be sociable," he said—"your sister, Gratitude." The two virtues were indeed astonished. This was the first time since the creation of the world that they had ever met.

LOCAL NEWS ITEMS

Next Wednesday afternoon will be the first half holiday of the season in Claresholm.

Mr. and Mrs. A. H. Wallis moved to Calgary on Wednesday and returned Thursday.

Mr. O'Brien, of the Ford Motor Co., Calgary, was a visitor at the Claresholm garage this week.

R. S. Macdonald has taken up the position vacated by Eric Moffatt at the Claresholm Garage.

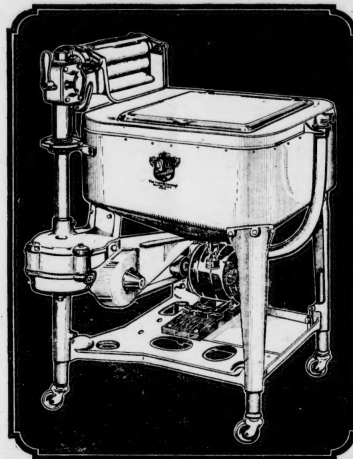

Adolph Amundsen has purchased a new J. I. Case tractor and is now making the dirt fly in his field.

The Lutheran Ladies' Aid will hold a tea in Wyatt's show room one door south of Queen's Hotel, on Saturday, May 15, from 2 to 6 o'clock. Everybody welcome.

E. C. Payne, of Drumheller, formerly of Claresholm, spent the week end in town. He is at present engaged in introducing a new auto jack.

Have You a Dread of Wash Day?

**The Maytag can solve
your problems**

For homes without electricity the Maytag is available with inbuilt gasoline motor. Can be purchased on the monthly payment plan.

9 Outstanding Maytag Features

- 1—Washes faster. The Gyro-foam Principle creates a more highly energized, turbulent and continuously effective water action. No idle water.
- 2—Washes cleaner. The Gyro-foam Principle mixes the soap evenly throughout the water, and forces the super-cleaning, sudsing washing solution through the meshes of the clothes. No idle suds.
- 3—Largest hourly capacity in world—30 the ordinary family wash per hour. Tub holds 21 gallons—4 gallons more than ordinary washers.
- 4—Most compact washer made—takes floor space only 25 inches square.
- 5—Cast aluminum tub—can't warp, rust, rot, swell, split nor corrode—cleans itself in 30 seconds.
- 6—Easily adjusted to your height, and height of tub.
- 7—Clothes can be put in or taken out while washer is running.
- 8—Metal swinging wringer. Low. Swings into 7 positions. Adjusts itself automatically for handkerchiefs or blankets. Automatic drainboard. Instant tension-release. All parts enclosed.
- 9—The Maytag is furnished either with electric motor for wired homes, or with in-built gasoline motor where electricity is not available.
